Your AI-based knowledge network  
at the click of a button

## Taking knowledge management to the next level – with generative AI by msg.

Forget about isolated solutions and unstructured volumes of data – here comes msg.DocChat. Our AI-driven assistant transforms the way your organization manages knowledge. msg.DocChat provides answers to your questions directly from company documents, ensuring transparency and adherence to GDPR regulations. Eliminate the frustration of prolonged information searches.

With a high level of transparency, msg.DocChat connects each answer to its original document source, allowing you to verify the basis of the results at any moment.

Furthermore, msg.DocChat boasts remarkable scalability, effortlessly adjusting to your needs, whether for a small team or a global enterprise. From seamless integration into existing

workflows to use within complex organizational structures, msg.DocChat evolves alongside your organization.

Additionally, the system's flexibility allows for the creation of company-wide, curated knowledge databases or the management of specific information assets. These diverse application possibilities position msg.DocChat as an indispensable tool for effective knowledge management. Regardless of your organization's challenges, msg.DocChat is designed to adapt to your needs, providing a sustainable solution for the future.

### Why msg.DocChat?

msg.DocChat stands for transparency and flexibility. Whether it's contracts, guidelines or technical documentation, msg.DocChat gives you the right answers to your questions or those of your customers in a matter of seconds. This rapid response capability not only conserves precious time but also enhances employee productivity.

### Features:

- > Connection to company-wide document sources
- > Automatic updates when documents are modified
- > Compliance with GDPR regulations and data sovereignty
- > Well-defined roles and access permissions
- > Use of open source large language models
- > Minimum development effort for seamless integration
- > Curated data assets for greater confidentiality and reliability

value – inspired by people

msg

**Your benefits at a glance:**
