msg.S/4 Cloud ERP Starter for GROW Fast

Fast and predictable SAP Cloud ERP implementation
for midmarket companies

SAP® Qualified
Partner-Packaged Solution

Fast and predictable SAP Cloud ERP implementation for midmarket companies

Start your digital transformation with a fast, structured, and low-risk approach. The msg.S/4 Cloud ERP Starter for GROW Fast package enables midmarket companies to launch a modern ERP system within weeks, based on SAP Best Practices and a Minimum Viable Scope.

Instead of starting with a long and complex ERP project, companies can focus on their core business processes first and then continuously expand the solution as their business evolves.

12–16 weeks

1 localized country

1 legal entity

Core ERP (R2R, P2P, O2C)

Estimated implementation cost (net)

starting from EUR
179 000

Fast business value, predictable implementation

- **Fast implementation, immediate value**
Go-live starting from 12–16 weeks, based on predefined scope.
- **Transparent costs**
Transparent cost estimate throughout the project.
- **Low risk, proven methodology**
Based on SAP Best Practices and a standardized delivery model.
- **Minimal business disruption**
Daily operations can be maintained during implementation.

Start small. Grow fast. Scale continuously.

The package is based on SAP's validated, industry-agnostic Minimum Viable Scope, covering the most important business processes for a fast and secure start. It enables companies to launch their digital transformation quickly with the essential ERP capabilities needed to run their core operations — including embedded AI, analytics, and integration from day one.

Once this digital foundation is in place, the solution can be expanded step by step with additional processes and business capabilities to support continuous growth and innovation

Predefined business scope – based on SAP Best Practices

Finance and Controlling (Record-to-Report)

- General Ledger (GL)
- Accounts Payable and Accounts Receivable (AP/AR)
- Asset Accounting
- Financial Closing and Reporting
- Basic Cost Accounting and Controlling

Procurement (Procure-to-Pay)

- Purchase Requisitions and Purchase Orders
- Contract and Supplier Management
- Invoice Processing
- Basic Procurement and Inventory Processes

Sales (Order-to-Cash)

- Quotation and Order Management
- Delivery and Fulfilment
- Billing
- Basic Sell-from-Stock Processes

Core platform capabilities

SAP Cloud ERP (S/4HANA Cloud, public edition)	SAP Business AI	SAP Integration Suite
• Data migration and master data handling • Embedded artificial intelligence (AI) • Built-in analytics and reporting	• Forms and output management • Compliance and reporting support • Integration middleware	

Built on a future-ready SAP cloud foundation, the solution combines ERP, embedded AI, integration, and reporting capabilities to support both immediate needs and long-term business evolution.

Notes / assumptions

- SAP product subscription fees are not included in the package. The customer contracts directly with SAP; for SAP Cloud ERP, the minimum subscription is 15 users.
- The package applies to one localized country and one legal entity.
- The detailed scope items of the package, as well as the related responsibility matrix (RACI), are included in the Scope & Delivery Definition appendix.
- The offer is governed by the currently valid General Terms and Conditions of msg Plaut Hungary Kft., which form an appendix to the offer.

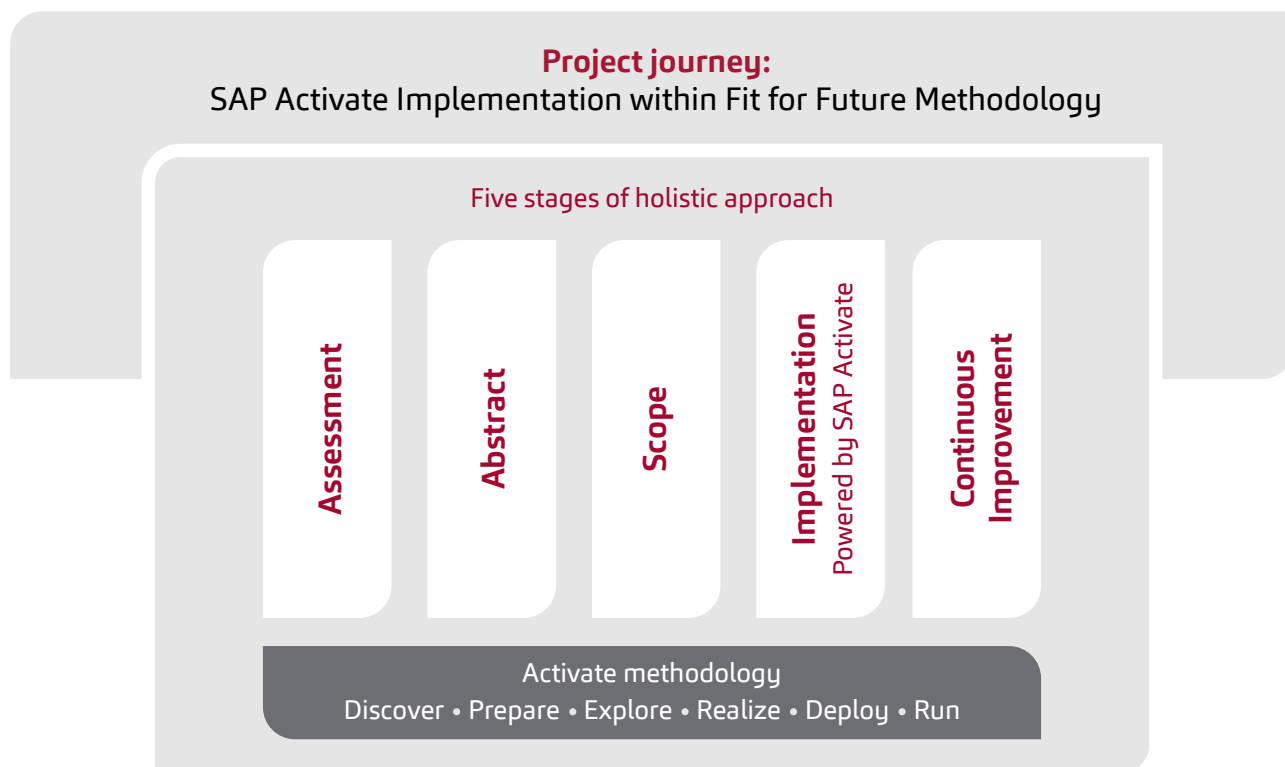

The msg.S/4 Cloud ERP Starter for GROW Fast package offers a fast and standardized approach to SAP Cloud ERP implementation. However, to ensure that this approach truly fits your company's operations, complexity, and future ambitions, **we recommend conducting a structured preliminary assessment.**

Preliminary assessment – Fit for Future

A structured pre-implementation phase to ensure the right scope and approach before starting the ERP project.

The msg Plaut Fit for Future methodology is a business-focused approach supporting companies in preparing for SAP implementation and selecting the optimal implementation path. It is aligned with the SAP Activate methodology and covers the early phases of the ERP lifecycle.

The preliminary assessment is based on the first three phases of the methodology: _____

- **Assessment** – review of the current operation and key business processes
- **Abstract** – identification of business needs, pain points, and data flows
- **Scope definition** – definition of the implementation direction and project framework

What does this phase provide?

- Structured assessment of business processes
- Fit-to-standard evaluation based on SAP Best Practices
- Gap analysis and definition of the solution approach

Outcome

- Clear recommendation on the next step
- Defined scope and prioritized functionality
- Foundations required for project launch (e.g. scope, roadmap, RACI, licenses)

Why do we recommend it? _____

The assessment provides a solid basis for deciding — without SAP license commitment — whether the standard GROW Fast scope is suitable for your company. If your business requires a different setup, we identify the gaps and define the framework for a tailored SAP implementation approach. This ensures that the project starts with the right scope, the right level of complexity, and a clear roadmap for future growth.

Fixed price of the Preliminary Assessment package (net)

12 900 EUR

Start your SAP Cloud ERP implementation quickly and predictably!
