msg.Variant Analytics

IMPROVE YOUR VARIANT CONTROLLING

Variant manufacturers need to be able to make flexible and reliable statements about sales figures and profitability. But in the SAP standard, such information is difficult to master.

The variant model is subject to constant change. New features, characteristics, dependencies and more are the order of the day. Reports in SAP ERP or detached analyses on exported data slices must be regularly revised and recreated.

With msg.Variant Analytics, msg offers a process-integrated, automated cross-SAP ERP and cross-SAP BW solution that supports you in the Pflege and evaluation of the database in SAP BW.

The main advantages

Flexible and expandable analyses for variant configuration

Cost and time savings through easy handling for department and management

100 % SAP HANA and SAP BusinessObjects compatible

Key features

The msg.Variant Analytics module prepares the configurable data for extraction as the basis for analytical systems. The management and maintenance of the VC master data in SAP BW is largely automated. Changes in the data model on the ERP are automatically updated in BW.

The data transfer between ERP and BW takes place in a delta mechanism to keep loading loads low.

Elements of the solution

+ Mapping and control tables for the selection and structuring of the relevant features.

+ Provision of the configured products and VC characteristics for further analyses and evaluations

+ Templates for evaluations in SAP BW 100 % SAP HANA-ready

+ 100 % SAP BusinessObjects and SAP Lumira compatible

+ Extendable with predictive analytics and data mining based on Big Data

Besides msg.Variant Analytics, the industry-neutral solution msg.Variant includes other modules and packages with which you can optimise the SAP standard:

msg.Variant Sales
Your sales process optimally supported

msg.Variant UI5 Quotation Configurator
Your digitised sales process

msg.Variant Process Optimization
CAD, 3D, e-commerce and ECM optimally integrated

msg.Variant Calculation
Calculate your variants and save time

msg S/4 Discrete Manufacturing Industries
CAD, 3D, e-commerce and ECM optimally integrated

msg.Variant SCM
Simplify your supply chain processes
